[Who Is a Terrorist?: Lessons from Thailand and the Philippines](#) – thediplomat.com, January 13, 2015

...The Bangkok protests differ in both scale and objective from many of the genuine terrorist incidents—conducted by groups such as ISIS, Boko Haram and Pakistan’s TPP—detailed elsewhere in the report. Rather than purging domestic or global society of infidels or modern beliefs, they were manifestations of an (albeit unsavory) strategy aimed at securing domestic political power. A quick reading of Thailand’s modern political history, where cycles of protest and low intensity violence have typically and frequently preceded changes in political power, shows both how normal and effective such strategies are. Indeed, the use of violence, or threats of it, are a common strategy for securing political and economic power in much of the developing world and beyond—at both the national and local levels. Inter-communal riots in India, organized crime in Guatemala, local land conflicts in Indonesia: each involves the use of violence by non-state groups for political-economic purposes. If one is to include such acts in a definition of terrorism, and consistently code them as such, the number of terrorist acts would rise exponentially in most countries...

...To understand the present and project into the future, it's important to understand Thailand's recent past. The 2014 military coup marked the crescendo of anti-government street convulsions, staged initially against an amnesty bill that would have paved the way for the criminally convicted self-exiled former prime minister Thaksin Shinawatra to return to Thailand a free man under his younger sister Yingluck Shinawatra's elected government.

Those protests later morphed into broad, if not vague, calls for cleaner governance, an end to corruption and an overhaul of democratic politics. The street protest-enabled coup, rather than an answer to a popular reform call, was clearly orchestrated by royalist elites to ensure that top generals, rather than squabbling politicians, are in control at the time of what many view will be a delicate royal succession...

The source said Prime Minister Prayut Chan-o-cha would not accept the proposed talks as he maintains Thaksin must return to Thailand for court sentencing in his conflict of interest case. Indirect talks have been held with Thaksin asking him to support the NCPO’s political roadmap which he has not done, the source said...
